6.	**Description of content:** Proposed maximum residue limits (MRLs) for the following agricultural chemical: Pesticide/Veterinary drug: Deltamethrin and Tralomethrin.
7.	**Objective and rationale: [X] food safety, [ ] animal health, [ ] plant protection, [ ] protect humans from animal/plant pest or disease, [ ] protect territory from other damage from pests.**

8. **Is there a relevant international standard? If so, identify the standard:**

[X] **Codex Alimentarius Commission *(e.g. title or serial number of Codex standard or related text)*:** Pesticide Residues in Food and feed – Pesticide Index –135– Deltamethrin

[ ] **World Organization for Animal Health (OIE) *(e.g. Terrestrial or Aquatic Animal Health Code, chapter number)*:**

[ ] **International Plant Protection Convention *(e.g. ISPM number)*:**

[ ] **None**

Does this proposed regulation conform to the relevant international standard?

[ ] Yes [X] No

If no, describe, whenever possible, how and why it deviates from the international standard:

Chinese-cabbage, Lettuce and Spinach

The Ministry of Health, Labour and Welfare of Japan (MHLW) conducted dietary exposure assessment for Deltamethrin and Tralomethrin on the basis of national consumption data. If highest residue (HR) values specified in the JMPR report are used in the calculation, the estimated short-term dietary intake for chinese-cabbage, lettuce and spinach may exceed an ARfD of 0.01mg/kg bodyweight which was established by the Food Safety Commission of Japan respectively. Therefore Japan proposes the draft MRLs for chinese-cabbage and lettuce based on the supervised residue trials for such plants which were conducted according to the Good Agricultural Practices (GAPs) in Japan. Japan also proposes deletion of the MRL in spinach since Deltamethrin and tralomethrin are not permitted to use for spinach in Japan and there are no supporting date submitted.

Wheat flour (except whole grain) and Wheat bran

The current MRLs of 0.3 ppm in wheat flour (except whole grain) and 5 ppm in wheat bran will be deleted because the MRL of 2 ppm in wheat will be set on the basis of the submitted data. MRL in raw agricultural commodity apply to their processed commodities (including wheat flour (except whole grain) and wheat bran) taking into account the processing factors (the JMPR estimated the processing factors of 0.91 for wheat flour (except whole grain) and 3.3 for wheat bran). Therefore, the deletion of MRLs in wheat flour (except whole grain) and wheat bran will not strengthen the current regulation, and the proposed MRLs conform to the Codex MRLs.

9. **Other relevant documents and language(s) in which these are available:** Food Sanitation Act (available in English). When adopted, these MRLs are to be published in Kampo (Official Government Gazette) (available in Japanese).

10. **Proposed date of adoption *(dd/mm/yy)*:** As soon as possible after the final date for the comment period.

Proposed date of publication *(dd/mm/yy)*: As soon as possible after the final date for the comment period.

11. **Proposed date of entry into force: [ ] Six months from date of publication, and/or *(dd/mm/yy)*:** These proposed standards will take effect after a certain period of grace.

[ ] Trade facilitating measure

12. **Final date for comments: [X] Sixty days from the date of circulation of the notification and/or *(dd/mm/yy)*:** 13 April 2018. Comments only to updated MRLs (marked with black circles and white circles in attached annexes).

Agency or authority designated to handle comments: [ ] National Notification Authority, [X] National Enquiry Point. Address, fax number and e-mail address (if available) of other body:

4.	**Regions or countries likely to be affected, to the extent relevant or practicable:** **[X] All trading partners** **[ ] Specific regions or countries:**
5.	**Title of the notified document:** Revision of the Standards and Specifications for Foods and Food Additives under the Food Sanitation Act (revision of agricultural chemical residue standards). **Language(s):** English. **Number of pages:** 11 https://members.wto.org/crnattachments/2018/SPS/JPN/18_0828_00_e.pdf
6.	**Description of content:** The Ministry of Health, Labour and Welfare of Japan (MHLW) intends to withdraw all the maximum residue limits (MRLs) for the following five agricultural chemicals due to lack of data. The five agricultural chemicals are not registered or approved in Japan, and/or do not have any Codex MRLs. Some countries set MRLs for some of these chemicals, but the MHLW could not confirm sufficient data for risk assessment and MRL setting. Those MRLs were provisionally set over ten years ago, and it is difficult to maintain those MRLs anymore unless sufficient data for risk assessment and MRL setting are provided. Therefore the MHLW has decided to delete all the MRLs for the five substances. Those substances have not been detected in any imported foods in Japan for the last five

	years according to monitoring data on agricultural chemicals residue conducted by the MHLW. Japan is of the view that the deletion of the MRLs is unlikely to have negative impact on the current international trade. Pesticide: Fentin, Flucarbazone sodium, Hydramethylnon, Propazine. Veterinary drug: Oleandomycin.
7.	**Objective and rationale: [X] food safety, [ ] animal health, [ ] plant protection, [ ] protect humans from animal/plant pest or disease, [ ] protect territory from other damage from pests.**
8.	**Is there a relevant international standard? If so, identify the standard:** **[ ] Codex Alimentarius Commission *(e.g. title or serial number of Codex standard or related text)*:** **[ ] World Organization for Animal Health (OIE) *(e.g. Terrestrial or Aquatic Animal Health Code, chapter number)*:** **[ ] International Plant Protection Convention *(e.g. ISPM number)*:** **[X] None** **Does this proposed regulation conform to the relevant international standard?** **[ ] Yes [ ] No** **If no, describe, whenever possible, how and why it deviates from the international standard:**
9.	**Other relevant documents and language(s) in which these are available:** Food Sanitation Act (available in English). When adopted, these MRLs are to be published in Kampo (Official Government Gazette) (available in Japanese).
10.	**Proposed date of adoption *(dd/mm/yy)*:** As soon as possible after the final date for the comment period. **Proposed date of publication *(dd/mm/yy)*:** As soon as possible after the final date for the comment period.
11.	**Proposed date of entry into force: [ ] Six months from date of publication, and/or *(dd/mm/yy)*:** These proposed standards will take effect after a certain period of grace. **[ ] Trade facilitating measure**
12.	**Final date for comments: [X] Sixty days from the date of circulation of the notification and/or *(dd/mm/yy)*:** 13 April 2018. Comments only to updated MRLs (marked with black circles in attached annexes). **Agency or authority designated to handle comments: [ ] National Notification Authority, [X] National Enquiry Point. • : Commodities for which MRLs are to be lowered or deleted.

* The uniform limit 0.01 ppm will be applied to commodities for which draft MRLs are not given in this table and to commodities not listed above.

* Shaded figures indicate provisional MRLs.

* Diagonal line means deletion of a food category to which an MRL applies.

Note: The residue definition will be changed to sum of R and S isomers of dichlorprop. The current residue definition is dichlorprop only.

※1 Food category "Citrus natsudaidai, peels" will be abolished and integrated into "Citrus natsudaidai, whole", followed by the current food category system for MRLs for agricultural and veterinary chemicals in Japan.

※2 The Guideline Value of the WHO Drinking Water Quality Guidelines (Guideline Value: In the WHO drinking water quality guideline set for the purpose of maintaining and improving the quality of drinking water by the regulators and water supply service providers of each country in WHO, drinking water. It is a numerical value that is the basis for evaluating water quality and indicates the concentration that does not cause serious risk to the health of the consumer when ingested over the lifetime.)

1. including butter beans, cowbeans (red beans), lentil, lima beans, pegia, sultani, sultapya and white beans.
2. "Other pulses" refers to all legumes/pulses, except soybeans (dry), beans (dry), peas, broad beans, peanuts (dry), and spices.
3. "Other potatoes" refers to all potatoes, except potato, taro, sweet potato, yam, and konjac.
4. "Other cruciferous vegetables" refers to all cruciferous vegetables, except Japanese radish roots and leaves (including radish), turnip roots and leaves, horseradish, watercress, Chinese cabbage, cabbage, brussels sprouts, kale, komatsuna (Japanese mustard spinach), kyona, qing-geng-cai, cauliflower, broccoli, and herbs.
5. "Other composite vegetables" refers to all composite vegetables, except burdock, salsify, artichoke, chicory, endive, shungiku, lettuce (including cos lettuce and leaf lettuce), and herbs.
6. "Other liliaceous vegetables" refers to all liliaceous vegetables, except onion, welsh (including leek), garlic, nira, asparagus, multiplying onion, and herbs.
7. "Other umbelliferous vegetables" refers to all umbelliferous vegetables, except carrot, parsnip, parsley, celery, mitsuba, spices, and herbs.
8. "Other solanaceous vegetables" refers to all solanaceous vegetables, except tomato, pimiento (sweet pepper), and egg plant.
9. "Other cucurbitaceous vegetables" refers to all cucurbitaceous vegetables, except cucumber (including gherkin), pumpkin (including squash), oriental pickling melon (vegetable), watermelon, melons, and makuwauri melon.
10. "Other mushrooms" refers to all mushrooms, except button mushroom, and shiitake mushroom.
11. "Other vegetables" refers to all vegetables, except potatoes, sugar beet, sugarcane, cruciferous vegetables, composite vegetables, liliaceous vegetables, umbelliferous vegetables, solanaceous vegetables, cucurbitaceous vegetables, spinach, bamboo shoots, okra, ginger, peas (with pods, immature), kidney beans (with pods, immature), green soybeans, mushrooms, spices, and herbs.
12. "Other citrus fruits" refers to all citrus fruits, except unshu orange (pulp), citrus natsudaidai (pulp), citrus natsudaidai (peel), citrus natsudaidai (whole), lemon, orange (including navel orange), grapefruit, lime, and spices.
13. "Other berries" refers to all berries, except strawberry, raspberry, blackberry, blueberry, cranberry, and huckleberry.
14. "Other fruits" refers to all fruits, except citrus fruits, apple, Japanese pear, pear, quince, loquat, peach, nectarine, apricot, Japanese plum (including prune), mume plum, cherry, berries, grape, Japanese persimmon, banana, kiwifruit, papaya, avocado, pineapple, guava, mango, passion fruit, date and spices.

15. "Other oil seeds" refers to all oil seeds, except sunflower seeds, sesame seeds, safflower seeds, cotton seeds, rapeseeds and spices.

16. "Other nuts" refers to all nuts, except ginkgo nut, chestnut, pecan, almond and walnut.

17. "Other spices" refers to all spices, except horseradish, wasabi (Japanese horseradish) rhizomes, garlic, peppers chili, paprika, ginger, lemon peels, orange peels (including navel orange), yuzu (Chinese citron) peels and sesame seeds.

18. "Other herbs" refers to all herbs, except watercress, nira, parsley stems and leaves, celery stems and leaves.

● : Commodities for which MRLs are to be lowered or deleted.
○ : Commodities for which MRLs are to be increased or newly set.

* The uniform limit 0.01 ppm will be applied to commodities for which draft MRLs are not given in this table and to commodities not listed above.

* Shaded figures indicate provisional MRLs.

* Diagonal line means deletion of a food category to which an MRL applies.

Note: The residue definition will be changed to the sum of deltamethrin,tolalomethrin, its metabolite CR【(R)-α-cyano-3-phenoxybenzyl=(1R, 3R) -3-(dibromovinyl)-2,2-dimethylcyclopropanecarboxylate】and CT【(S)-α-cyano-3-phenoxybenzyl=(1S, 3S)-3-(dibromovinyl)-2,2-dimethylcyclopropanecarboxylate】, expressed as deltamethrin.The current residue definition is sum of deltamethrin and tralomethrin, expressed as deltamethrin.

※Food categories "Wheat flour (except whole grain)" and "Wheat bran" will be deleted, and hereafter, MRL in their raw commodity (i.e. Wheat) will also apply to such processed commodities, respectively, taking into account their processing factors. For this substance, JMPR estimated processing factors of 0.91 for Wheat flour (except whole grain) and 3.3 for Wheat bran.

1. "Other cereal grains" refers to all cereal grains, except rice (brown rice), wheat, barley, rye, corn (maize), and buckwheat.
2. including butter beans, cowbeans (red beans), lentil, lima beans, pegia, sultani, sultapya and white beans.
3. "Other pulses" refers to all legumes/pulses, except soybeans (dry), beans (dry), peas, broad beans, peanuts (dry), and spices.
4. "Other potatoes" refers to all potatoes, except potato, taro, sweet potato, yam, and konjac.
5. "Other cruciferous vegetables" refers to all cruciferous vegetables, except Japanese radish roots and leaves (including radish), turnip roots and leaves, horseradish, watercress, Chinese cabbage, cabbage, brussels sprouts, kale, komatsuna (Japanese mustard spinach), kyona, qing-geng-cai, cauliflower, broccoli, and herbs.
6. "Other composite vegetables" refers to all composite vegetables, except burdock, salsify, artichoke, chicory, endive, shungiku, lettuce (including cos lettuce and leaf lettuce), and herbs.
7. "Other liliaceous vegetables" refers to all liliaceous vegetables, except onion, welsh (including leek), garlic, nira, asparagus, multiplying onion, and herbs.
8. "Other umbelliferous vegetables" refers to all umbelliferous vegetables, except carrot, parsnip, parsley, celery, mitsuba, spices, and herbs.
9. "Other solanaceous vegetables" refers to all solanaceous vegetables, except tomato, pimiento (sweet pepper), and egg plant.
10. "Other cucurbitaceous vegetables" refers to all cucurbitaceous vegetables, except cucumber (including gherkin), pumpkin (including squash), oriental pickling melon (vegetable), watermelon, melons, and makuwauri melon.
11. "Other mushrooms" refers to all mushrooms, except button mushroom, and shiitake mushroom.
12. "Other vegetables" refers to all vegetables, except potatoes, sugar beet, sugarcane, cruciferous vegetables, composite vegetables, liliaceous vegetables, umbelliferous vegetables, solanaceous vegetables, cucurbitaceous vegetables, spinach, bamboo shoots, okra, ginger, peas (with pods, immature), kidney beans (with pods, immature), green soybeans, mushrooms, spices, and herbs.
13. "Other citrus fruits" refers to all citrus fruits, except unshu orange (pulp), citrus natsudaidai (pulp), citrus natsudaidai (peel), citrus natsudaidai (whole), lemon, orange (including navel orange), grapefruit, lime, and spices.
14. "Other berries" refers to all berries, except strawberry, raspberry, blackberry, blueberry, cranberry, and huckleberry.
15. "Other fruits" refers to all fruits, except citrus fruits, apple, Japanese pear, pear, quince, loquat, peach, nectarine, apricot, Japanese plum (including prune), mume plum, cherry, berries, grape, Japanese persimmon, banana, kiwifruit, papaya, avocado, pineapple, guava, mango, passion fruit, date and spices.
16. "Other oil seeds" refers to all oil seeds, except sunflower seeds, sesame seeds, safflower seeds, cotton seeds, rapeseeds and spices.
17. "Other nuts" refers to all nuts, except ginkgo nut, chestnut, pecan, almond and walnut.

18. "Other spices" refers to all spices, except horseradish, wasabi (Japanese horseradish) rhizomes, garlic, peppers chili, paprika, ginger, lemon peels, orange peels (including navel orange), yuzu (Chinese citron) peels and sesame seeds.

19. "Other herbs" refers to all herbs, except watercress, nira, parsley stems and leaves, celery stems and leaves.

20. "Other terrestrial mammals" refers to all terrestrial mammals, except cattle and pig.

21. "Edible offal" refers to all edible parts, except muscle, fat, liver, and kidney.

22. "Other poultry animals" refers to all poultry, except chicken.
